Received: May 4 th 2022 Accepted: June 4 th 2022 Published: July 11 th 2022	The research focuses on the legality of the use of military force in public international law and Islamic Sharia and its importance in determining the cases of collective legitimate defense and the development of explicit legal instructions in the Charter of the United Nations that enable states to collective legitimate defense in cases of a coup against legitimacy or facing aggression by another state
Keywords: Use of Armed Force, international law, Islamic law	

Rationalization of cases of acute anorectal dehydration, and the establishment of proper legal controls in the charter of patients for argument The joules suffocate the joules of the joules in the event of a coup d'état. On the joints of the round and the pads with light and heavy weapons, and the screeds, as is the case in Lying condition, and as a moment of stagnation, the marrow extract is excreted in the mouth to end the culture. It leaves the semolina in the diaphysis, its diaphysis, the end of the amygdala state, and the diametric insufficiency in The weather, where a basic command overshadows the position of the right to ascend the power in air relations, regardless of the desert The scapular or occipital The joys were the best and the best. Going out of the way to make deaf bells that open up the inner relations in light of the concepts of strength and weight on the knees Although power plays an essential role in the geopolitical dynasty, it has become instrumental to the realization of brutality. As for the sahih affiliation, the importance of Haha al-Shy'a becomes evident during the annotation of the right of severance over The joule reality, so that it has become the most accurate of the liquids that are crossed by the joule in the seas. Al-Jawlia in Al-Khagaa, although the Sajjat Al-Jawli tried to perform Hajj with Al-Ajwan, and Al-Hakhb has become aging, and Jamia has become more intense. India and all of this encouraged the reluctance of the Charter of the United Nations to argue for the development of a comprehensive outline for the instigation of cases of incitement Or create tears. Awal Ahsiyah search The basicity of the research is that the social network is scrambling to spur him on and keep him weak and humiliated. The aspiration of Neb Thukhtu, Khaykhatu, and El-Sisa, the suction of the mouth, is trampled by life and engorgement in the thicket of the sea. On the other hand, there is a small

lump in the stomach, which is not the case with the female patients in the heart of Wahsha Al-Akhbi, and the craving for sneezing Mushalq Al-Qaqa and Al-Ajwan in their dealings with the Joule. This brother places a heavy responsibility on the men of the jaws And the law is applied to grabbing Muskak and the cheating and analyzing them, and reaching the smooth practical methods To treat the suffocating health before the jolly record, to force the urgency and subjugate it to the jolly will, and by noticing So, you will be in Bejaia for a few times, and the most powerful parts of Judgment will come to you, namely the nines. Al-Ajuwan and it will be annihilated by the presence of the spleen of the present-day fatty acids that affect the popularity of Al-Ajuwan. The rapists will become so trampled that they trample the arrogance in defense of the wicked, and trample the arrogance and the arrogance. Preserving the arms and the mother's arms

Secondly, The Search Problem

The problem of the research is that the explosion of blood pressure and the thickening of the grains that open to the thousand records Qani and Ajd of the uppermost part of the intestine, as an argument for the continuity of the gullible spleen and the preservation of tears and tears And they concluded that the world does not give a lot of money to women over the course of reality, and I disgrace it.

The ligaments do not irrigate the occipital congestion without is location and collapse of the occipital, and social, ramifications.

Third: The search scene

statement of desires comparative analysis tape will be saturated, where the legal statements of the ears will be included with an Islamic jurisprudence now

Fourth: Research Structure

We will discuss this research according to the two topics that we gather in the first research on the concepts of the responsibility of the use of power Peace in Islamic jurisprudence and the Juli law In the first part, we discuss the disobedience of the use of mercy in accordance with Islamic jurisprudence.

In the second part, you will learn about the legal adaptation of the flexibility of using the right to be allowed in the law.

In the second research, I will listen to the general reference to the effectiveness of the use of merciful money. On the basis of this, we will go to rich for a place where we will gather in the first section at the sanctuary kitchens. As an exasperation on a radiant use of force in the inner relations, and in the second aspect, the stinging deprivation Al-Qa'dah in Aerial Relations

First Search

The concept of the excuse of the use of armed force in Islamic jurisprudence and international law The tyrannical inequity that dictates the role of power in ephemeral relations has led to the setting up of sinister bellows that sprout Anterior Relationships on the Light of the Concept of Power and the Struggle of Al-Khuja Although power plays a fundamental role in the aerodynamic study, however, has become a means to achieve all the cravings that must be invaded by armed bodies

In full, the provisions of the Charter of Al-Ama' for the argument in Megan, the maintenance of tears and tearsIn the brightest of the argument Juliage in order to increase the effectiveness of the axis of expansion, not to be intimidated by force or agitation in relationships

On the basis of this, the research will be divided into two parts, and we will gather in the first chapter, in a separate chapter. The legality of the use of peace of mind according to Islamic jurisprudence, but in the second part, I will listen to the adaptation The legality of the absurdity of the use of the merciful force in the Julian law .

First Order

The excuse of using armed force according to Islamic jurisprudence The bloody soldiers differed over the fact that the army of the Syrian army should seize its arms over the Qilij: The first: It is obligatory to possess it, and it is permissible to make it easy.

The benefits of the Book of God Almighty:

Ajoukah and Akhej are not for the sake of Allah, they are not allowed to be heard, and they do not pity anything for the sake of Allah.

And those who fight for the sake of God, they fight and do not protest, for God does not like to be protested)

Second-order

Legal adaptation of the legality of the use of armed force in international law The value is the most important of the questions and tools that the tour introduces to achieve its goals. A comprehensive understanding of power.

It escalates into a group of workers and the progress of economic, political, military, and extravagant factors influences the Al-Bassa is a factor in achieving the policy of the round in international relations and the current situation and doubts The corpus delicti of the flat surfaces of the use of the politics of dominance in international relations and Asia: the arrogant shyness such as the slanderers, Al-Jasaa alliances, political and agile alliances such as Al-Ahmadi Al-Ashdi, and political and economic alliances.

Surat Al-Anfal / Verse 24

Surat Al-Sastishah / Verse 1

Such as the European Union. There are no interruptions, such as economic and political obstacles or whatever.

It is used in the name of the loudest love of the samaha.

The most important of the principal remains of Mrs. Lakhya is the use of power in family relations. The second, especially in the cold hiatus, which led to the fading of the stifling squatters that dries up The oil tanker has been radiated, and the areas that the oil tanker has been shining through have radiated out, with the presence of the dark surfaces.

political and economic.

So that it became slightly heated in the interaction taking place between the joules, and the moment the points of energy were analyzed in the joules.

Judicial Relations

And sometimes Halaqa found it that the dryness behind this was an attempt to stop and encourage the use of force.

He is still in the middle of the night, and coming to it, and he is not in a difficult situation, like a cough, and with We renege on agreements and advertisements in relation to some of the rumors, using the power and authority.

To make a lot of differences and sharp outbursts in the debate and for which it contributed greatly to the use of the pot in cases of excruciating and scattered lightning, and the use of an incense burner.

And that the dalam is with the most powerful, because it needs to study with its merging with the Jolly Law.

Ethically speaking, it is clear that reliance on the legal reality without changing it is illegal.

The male factor makes an internal and an argument that the crickets and the stingers are successes due to the cramps and the possession of strength .

Because it is necessary to achieve the truth, remove the obstacle, and speed up the joys of the day and the nine rites.

The just thing And responsiveness affect the speed of caring relationships, for a moment that deprives the brain of possessing strength and arrogance to the cheek of the arrogance. Byha, it is not permissible for people of the air record to use the damsel and the abstinence without the law for a meal. The hostility in the internal relations, which disturbs the air and the air in the suffocation of my throat, especially the fact that A person who does not stand above the law and above the opulence, complaining about the rights of the people and slumbering about it The basis, and the delay of the decline of the political and the control of the Goliath politic Kamo Dakhour and Al-Hassa presented the young man to the two studies of striving for strength in the field relations The first research, the reality of stagnation in air relations .

The second search

The general framework for the absurdity of the use of armed force

By slandering the state of complete disobedience to the use of power in human relations in the atmosphere of prostration in the covenant

The brightest of the argument, he had already covered his piano in the past, as if the exclamations that served on the sabja were worn out.

It comes as a cheek on the use of it, the succumbing to the meeting, the difference that it differs from where the saddlebags, sighs, and strife

As a matter of fact, as the tour breaks down to a glorified match, the context does not cover the parts of the tour without the use of power.

In the form of defensive cheek or stammering in the face of the vulnerability, the use of this use only cracks in the presence

Searching for a restaurant, we gather in the first part, from the kitchens of coming to the summit, in the intimate relations On the other hand, in the second aspect, starvation, as an exacerbation of the radiant use of force in the internal relations

first order

Manifestations of resorting to force in international relations It is worth noting that the cuttings are good, and the means of grass are used by the joule for the same reasons and their differences, or In pursuit of a political or ecclesiastical goal or endeavor, his tyrannical regime was not yet cruel in history.

Al-Indani and Al-Qaniyah Al-Qaniyah, which slandered and slashed the skewers of their quests, were the subject of the admonition of the Julian Law The agreement was signed and the law of the pilgrimage was rooted after I went to work in prayer for the pilgrimage without coming to the mosque. Anti-inflammatory, anti-inflammatory, anti-inflammatory, and anti-inflammatory

A previous non-discrimination term.

Reducing sluggishness:

The sluggishness was in the Khaidee methods that the Joule used to make peace with her in her sexual relations. Cut the size of the saddle, and shove the mouth of the mouth in a big way, cursing the European alliance, the squishy, then it shrunk Thoughts on me until I became savage, sluggish, sluggish, sluggish The present is not the present, and the other is afraid that I can make a snippet to reduce the arrogance, which is the one who does not during the curvature of the arrogance,

That shyness makes a country shy away, and in this regard, Talking says that shyness is a nightmare of what shyness and shyness live in. Another country's affairs, with a haughty demeanor, and with a willingness to maintain or change things in their own right, Reluctance to be shy about being treated with honey and beggars, and taking care of the context of public relations. The sluggishness takes place whether the pelican was before the seventeenth century, or not, and it was necessary to inform me.

The diapause and the social endoscopic

As such, shyness is the position or solution of a double sided party in the name of a state, an international community, or a group .

Mg Joule bypassing the fears of the cruel relationship to be known blindly. She is trying to subdue her will to a country or a country The joule is forced to eat some kind of honey, or to take an unpleasant position, whatever it may be. As for the dryness and the goals of neglect politically, living or legally.

Often times, the goals of those who do not make themselves known are worthy goals and the goals that they pursue in the compliant round.

This can be done by adopting an ideological life, an ideological ritual of living, or maintaining the existing situation in a state of affairs.

Upheaval and chaos, and it is necessary for the detectives to stir up the most powerful thoughts in the sack of saqjas, and to squash Relying on the coastal region, the turmoil of the rich movements that were sweeping Europe in Bejaia The ninth suction cup. And the tug of stagnation remained intact for the sake of the European joules, even after the demise of the causes In

the days of the squash carnivore and its annihilation, when she died, she was killed by the weed of the camel and the sissy of the age of 8101 Because it is the most densely populated and degraded state in the world, and that the Jayna and the coastal civilization must be defined.

Indeed, shying away from the path of embracing gentry, civilization and culture was a lofty arrogance that must be The association with him increased this belief in the weakness and indifference of the Ottoman tour and the vastness of the European tour in (Daham Shaw Bejouf, former Margaret, p. 800)

Restoration of the European regions that were under its name, such as Greece, Bulgaria, and its capital, on the basis of Fondling Scania Alsdeigh.

And the shyness was also sometimes obligatory in order to preserve the fearful prestige or the life of the sages.

On its embassies, you are the cause of the breach that was destroyed in the Rig after the arrival of the world to your stomach, And that the Jolly Law does not break down sloppiness During this time, the use of milk and the spread of honey in order to ensure the fulfillment of basic rights in The last joule usually performs the use of force, even if it is for the indifferent parts of the tongue. The stinging of the sahsah is absurd in its meaning, and there is no way to slander it or describe it except that it is a complete and strict rejection.

Claim to have a right to be able to use power in order to protect the fundamental rights of India as The slander is considered a disgrace to the fact that it is a disgrace to the failure of the mechanisms of argument in proving the expansion of the Indian goals.

Al-Khafa'a, in charge of her military affairs, and the general public opinion of Wa'a Al-Hajj has been revealed, as a pretext for the strength of her work.

It was scattered with intent to spread sluggishness, and in the barren standing, the general atmosphere filled the thick of conditions with cases Shyness is like the sloppiness of the mechanisms of American argumentation in Faitham, and the declaration is not a powerful and fussy pact.

The shyness, as it does not attack any legal bases, threatens to be an emphasis on the basic predators.

Al-Sa'hufa by Ajam Al-Tajjal and Lukja pointed out the declaration and in the Dictionary of the documents, the Al-Qissiah Al-Qadisiyah such as Mashtasha .The American Joule, the Al-Joul Arab League, and the Al-Hajja Al-Akhiliya Shatta are covered in dirt and dirt.

Ghaha Al-Kakhar insists that every country has the right to choose its political and economic system and the meeting without any delay in any other country, and no country has the right to delay in doing so, or Don't be stingy for any reason why the internal and external

affairs of any other country are urgent, so don't be shy sighs and all other forms Political or economic and cultural terms are considered free, and everyone has to sense the non-discrimination and intimidation Translating and disseminating benevolent activities of a terrorist or naked nature, which degenerate into veneration.

The system of the ruling is another state by being ignorant or sluggish in international disputes for the sake of another country.

The declaration should in any way incite the applause of the Charter of the United Nations for the pretext of perpetuating Lacrimal and uterine fibroids, especially the occipital prolapses in the third, third, and third periods.

Secondly, the aggression of a larger country against a weaker country in order to achieve gains and benefits and to expand in Prejudice and strife

for the honeycomb of the arrogance, the use of force is not considered against the side of the (haj 5j.)

Considering the arrogance preceded the joule, as The joule is a preliminary evidence, and if it is not clear on the calcification, it is possible for the mass of the mother to reach up to Contrasting or disapproving of the light of the fears of Al-Qazia. Based on whether or not the severance was found to announce the election or not, the following honeys are considered honeys. (Salih Al-Jig Ahsa' Hajj, previous publication, pg. 844)

First: A country becoming or attacking its remnants of peace on the territory of another country or any other enemy occupation.

May it be temporary, effective tomorrow, or otherwise, using the goodwill of the territory of another country, or Second: The disavowal by a state of its remnants of peace, the land of another state, or the use of any permission that was not before a state.

Hit the land of another country.

Third: The heat of the ports or the coast of a country without the side of the peaceful seas of another round.

Fourth: What attacks do you use by air for a tour, by air, by sea, or by air for a tour?

Inactive: the use of peaceable prayers for a tour of prostration within the territory of another country following the tour Integrity in a way that contradicts the statements that will be made in the agreement or any excuse to remain in it The lands to what followed the expiry of the agreement.

second order

Instrumental defense as an exception to the radiant use of force in international relations The activation of the amino acid complex in the morning is not related to the drug before the brink of honey, but rather a precipitation.

Qadhiya, and the slanderers of the bloodshed and the blood of the Gulf, and their return to Narabisa, changed that the standard of The basic reinforcement of the ovulation is that the mass of the ammonia must be absorbed into the opening and must be (Salih Al-Jig Amikh, previous publication, p. 24 2)

Correct and clear according to what you describe in the third quarter or the third door of the third door of the document.

The brain is deepened by an act of ecclesiastical action, while in the case of the act of suffocation, it is either the thigh or the thigh.

Or the act of making a previous aging state, the brain does not need to be emptied of the amino acid, and the right to starvation.

All legal sects are abstained from the right of Al-Shafadi, and the right of the detainee is valid as long as he is reprimanded.

And he is still as a memory in the shadow of the charter of Al-Ama' for argument, and he is convinced that Haha is right in the Beja'i records.

Beg Alif and Joules to use it as a traitor, a traitor. As for the stuttering and stuttering, The use of the right is valid, such as the cart of the intestine or the body of the intestine.

Therefore, the use of force for the benefit of the child is considered an exceptional right of the general public.

The argument, with The hard usage in the context, and in some cases it is not enough to transfer the joules.

The use of the right to the truth He found some of the scabies, which in this way affect the mubashakh on the hourly joules, and they are a bank account.

Shafadia, and he does not put a pilgrimage now, or an acceptable excuse, in general, for the right of starvation, even if it is a complaint Attempts in this area.

Faqih al-Qaan went to the conclusion that the right of al-Jaffa is not valid The reasons are not just choices, or the most just reasons for the choices, and that the natural law does not encourage run out It is only the truth, but it is a joule to Sassartu, and in this Wolf says, any people must feel And that the greedy stifles the thousand, and begins to tremble the pains of the mother and the blood, and it feels like a stinger.

The most effective way to reduce the pain of the erectile dysfunction is to curtail or weaken the facts or the commands that cover the joules.

Because of its right to slander, and it is possible that the latter is the right of al-Dalalah and the right of al-Dalamah Political independence, the right to the meeting of the Sashag, and the right to the meeting of the economic armaments.

The brother has the right to be deprived of freedom, if something is wrong with the right of the tenth round .

Responsibility for the private tour, and at the end of the annual record of copying his success, the person setting up bodies International cooperation between the Joule and through it in order to raise the blood and the mother tongue, and for this purpose, Tashazl Al-Joul, with some of her Excellency's kitchens, and the owner of this quarrel with her in the covenant of Al-Ama' for the argument is added.

To this, the wheels that rotated during the setting of the document, the hustle and bustle of the day walked quickly.

The use of power is small, for the moment it has become necessary to despise the right to starvation, without defiance, and to liberate What did he actually do, as we obeyed the right to suffocation in Article 48 of the Charter?

The need to blaspheme this right and to argue with our righteous people that the wretchedness of the days of ignorance will bring about the coming of the common The use of merciful power is null and void, for the right to starvation without deprivation of liberty is annihilated.

Charter of the intestines for argumentation, treatment, exclusion, absence, scattering, non-use of force, gentlemen 5, tack, 80 mg, charter

The tour has the right to starve dehydration, even if it is not possible for the tour to recover from it. To make a joule meaning The latter, Raj al-Ajwan, and Wajjuj Athekh, disagreed with the right of the tour in Shamb al-Sada'aj without tackling the fiqh.

Al-Ba's excluded the dissolution of the right of the joule to foreplay with Ba'azia, attributing the one to the other without being subjected to the mother's body, because That puts him in the second class, where the tears and the gulls of tears are covered, and Akhon believes that no ,Dar Al-Jassaykhiyyah for the fragmentation and dispersal It is restricted to the right, as it is mentioned in the charter, so it is necessary to keep the sausage on its own terms

To the fact that there is a problem of suffocation of the coronary artery disease, which is being carried out by the sum of the joules, and the outbreak of hunger Al-Jasai, the brother turned to him Joule. And in the absence of the joule of the rolls Their own responsibilities to formulate the arguments of Messrs. 48 mg of the document.

The facilitator abstains, so you are under the responsibility of the one who makes the argument, and you either come with obstacles or honey.

The cochlear implant is clarified in Messrs. 8, the first pockmark and 08-02-05, 50 mg.

Al-Asthijjah. As for the concerns about dehydration without the erectile dysfunction:

It is noteworthy that the use of force to subdue starvation rather than erectile dysfunction is common in jolly life. So, the joule has a habit of not being secretive in the merciful quarrels, in order to give birth to a passion in it, and with khul' even though life. The smashing joules were fought by the brother of a great grandfather, with the treatment of the simple famine and the hostile alliance, except for That the tracks of the joule and the glial fish do not support the desire to use force when the signal of starvation. In the case of corpus callosum, the cases of cysts were present with scar tissue and emptiness, and the thick flaps were emptied on suspicion.

Evidence-based erectile dysfunction in acute cases is like a colic before it is suspected. He complimented him, hoping that starvation would not be necessary in the future. In another attempt to avoid dizzy and vomiting, most cases of dehydration, rather than laparoscopic. The absence of a small drought without the exception was a means for the locality without the occurrence of a commendable attack or the absence of precaution. The use of the occipital lobe was in rare and exceptional cases, in cases of dehydration and in vas deferens.

It is located outside the capillary boundaries of the "lunar" round, ie, it is dangerous to pursue starvation during sexual intercourse.

Self-inflating and self-inflating injuries

The compliment of the ludicrous round trip with a third country and the slander of the party or the conclusion of an agreement. Tapered Big Joule and the third round. Involve another country in order to protect its right to political independence.

The last round ignored the duty of the ignorant Ajam to disregard him, and scorned the slander of the first round.

And since the right of political independence and the duty of Ajam al-Takhlal are two afflicted rights, the right to be independent. Coming to starvation in the absence of deprivation for the urgency of the right to political independence is scarce. If you find a vaporizer, you will be submissive to make the last round too late, and some arrogant arguments about the right of the afflicted. To protect the right to political independence, and perhaps it is the right to strive to the whole of the country to be stingy in. The path of the general peace of the Jolie sensor is true that the spur of the moment in the second gentlemen is against the charter of Al-Amei.

Haha Al-Sh`a does not intend to applaud the evacuees, by denouncing the motive behind the conflict. The second argument regarding the right of suffocation against the stubbornness of the brother's coelom makes the right of Distress over the right to political independence, frightened that the free privatization

would find it at once. And Ajam Tdkh Good for a different jeopardy, and the surgical procedures before the joule must be in line with the The slanderous slander is not the slackness of the last joule, and the latter slander is the most compelling one that must be observed.

It is true that if the stinging was successful, then the first round was the result of force or agitation.

In the absence of the political independence of the tour, the use of the second round to gain or provoke it, and thus and exercise the right. Similar to the exclusion of the starvation in the evening and the negligence of the dead, it is a submissive defense against the rapist.

Bleeding during the erection before the joule. Increasing the political independence of a group that is free to take or grants that no responsible country has the right to. The most recent example of this stains the people of the week of the week, by taking the health measures to heal its damages.

In denunciation of the Jolly Law, nothing is sufficient for these thousands of people to abstain from severing their affairs, or blaming them with a choice or weed.

The days of a coercion of thousands of slaves in the oppression of a state, by slicing or facilitating another battle or honey. The sixth affair is directly related to the political independence of another round of al-Khula, despite the fact that the first round took the. Every one of the people who is scattered is not allowed to break the law, or to clear the cracks, in defiance of the Julian law of the law of separation, such as. These are the products that are not in the department or in another country. The procedures to be used before the first round are not correct.

Adequate to clear the hours without revealing their interests. In such cases, it is not the tour that dries up. Like these actors on their parish, they have violated the Julian law, or have violated any of their charges. It is not permissible to make any honey before the last round that is taken by honey.

It is subject to its political independence to the individual it does not mean that the zodiac round should remain confined. Hands or if they are unable to take any measures to lose weight may resort to taking medications or measures for starvation.

Excuse me, but these actions must avoid the tumult of the thighs and the stingers, who are responsible for the actions. (akhakh University, Al-Qakha.5442,Dar Al-Haliqa, Beshi Ghazi, p. 014).

The first round made noise, and in this case, the state of the flower is the pride of the union.

These are the corrections, and the right to be stricken without the wrath, provided that the rocks are salty, and that the time does not swell.

For disintegration, fermentation, and other actions (8) As for the repercussions of stubbornness on the reality of the dystopian act The large number of visitors to the political situation over the course of the relations between the two countries has become a clear reflection On the guinea pig, so that it does not leave the sap out of the sacks and scraps as a result of the stubborn turf The backlash is thick, and the reasons for this conflict are based on a variety of reasons, whatever they were. Economic, political, and negation of the hidden reasons, as well as the desire to expand the hurdles of the penis and the possession of power.

Economics and slander

Atmospheric conditions only increase the duration of time and achieve its goals in the cry and droop for the duration of the ejaculation On the joules, the scattering, and the most important of the weakest parts in the ark, is the success of the methods of argumentation.

The military is the round that has managed to break the Jolly law and implement the principle of bringing people to prayer.

In view of the ability of the mechanisms of the American argument to legislate for Shefdia public policies that adopt On the saddlebags of the hills, and the squawk's walk on the hills or the junction of the hills, and the thalzah of Zazan Seizures on the suction put a squid on the suction, saturated and produce squishy as if they will shrivel In the rest of the world, he placed your brother in a location in Iskaya, without pilgrimage, if he could find it, and search for expeditions.

It is important for them to scrutinize their stereotypes, which are in line with the American argument, to legislate an international model that is consistent with the Concerning the issue, the eradication, and the consolidation, in the matter of reform and change, and all of this is related to the specificity of the military action.

Provisions of the Jolly Law and Compliance with Documents

It shrieked in the rusty sacks that. Save the joules to make and own the most expensive weapons.

After writing this research, Anisha was divided into a series of conclusions and recommendations, which are

FIRST THE RESULTS

1 .The important role that power plays in international relations has led to the emergence of schools of thought

that explain international relations in the light of the concept of power.

2 .The international community may not use military force in international relations.

3 .The manifestations of resorting to force in international relations are interference and aggression.

4. In the event that self-defense is exercised, the conditions and requirements of self-defense must be met, and a declaration by the attacked state that it has been subjected to an armed attack.

SECONDLY, THE RECOMMENDATIONS

The current international situation is witnessing chaos and aborting any attempts for world peace and security and imposing hegemony through the use of military force. This leads to an increase in feelings of hatred among people. Therefore, the international situation cannot be stabilized if the foundations of international stability and balance are destroyed. Reform is by referring to the United Nations Organization and working according to what it stipulates when conflicts and wars occur.
