In the context of this article, the importance of legal education and upbringing of the military patriotism in the education of our nation's youth is to develop a mentally mature and physically healthy person. The role of national identity and historical memory is considered to educate young people in the spirit of military patriotism, to teach them to love their country, people and family, to learn the great heritage left by our patriotic grandfathers and to become their worthy heirs.

Keywords: Patriotism, military, youth, education, training, culture, the concept of a patriotic person, legal education, legal culture In this article, we will discuss the role of fiction, film, theater and visual arts in the service of the armed forces, love for the army, and the qualities necessary for the defense of the country.

We want to talk about the importance of art, to show a clear path to the goal of training young people to serve in the Armed Forces of the Republic of Uzbekistan, to love the army, to always be ready for the defense of the Motherland. Historical literature makes readers think about the thousand-year tradition of protecting the Motherland, instills a sense of pride in the heroes of the historical battles for the independence of the Motherland. It shows the greatness of the people, calls to protect the Motherland, instills hatred for the enemy. Historical literature reveals to students the importance of the struggle for the Motherland, reveals to young people the beauty and nobility of this struggle with all their hearts. Images of Princess Tomaris, shepherd Shiroq, Spitamen, Muqanna, A. Temur, Ulug'bek, Babur, S. Rakhimov, L. Alieva, K. Suyunova are spiritual examples for young students. Historical literary works dedicated to the people's struggle for their independence will help readers to understand the reasons for the occurrence of wars, to understand the deep foundations of the heroic courage of the people of Uzbekistan for their independence. Our

works about the war reveal the spiritual world of heroes in difficult trials, strive to create and educate in the minds of readers an example of defenders of peace in the Motherland and the whole world. First of all, they strengthen confidence in victory. In the most difficult moments for the country, they call not to lose heart, to protect every inch of the earth until the last drop of blood. Their books, poems, films, posters, works call for the fight for life on earth. Many writers created their works directly on the front line. With pen and paper, they were eager to attack in the same ranks as the warriors. Independence of Uzbekistan caused their importance to grow. In this situation, a condition has arisen to reconsider a number of issues of the educational process. Of course, this does not mean that world and Russian classics should be excluded from the educational process. Before the independence of our republic, Uzbek classics were in second place, and Russian classics dominated. In this way, entire generations were educated, education, candidacy and doctoral theses were supported. By now, it is necessary to familiarize students with more works of Uzbek

writers, there are many opportunities for the educational process. It is necessary for teachers, especially literature teachers, to use the works studied according to the curriculum for educational purposes. There should be a special exhibition of patriotic fiction in the libraries of educational institutions. The form of education is different. It can be: First of all, the students themselves read fiction. This is the most important. But the educational process should not stop there. Every book that children read should leave a good impression on them. should educate him Military in forming a sense of patriotism in young people the importance of patriotic education is also incomparable. Military patriotism education is a pedagogical process aimed at preparing young people for the defense of the homeland and military defense, forming their skills and abilities to organize military defense in emergency situations. The purpose of military-patriotic education is to prepare young people for the defense of the homeland and military defense, to form skills and competencies in organizing military defense in emergency situations, and the following tasks are performed in this process:

1. Providing preliminary theoretical knowledge and building practical skills on the basics of civil defense and military knowledge;
2. Preparing young people to prevent organized threats against national independence, state building and constitutional system of the Republic of Uzbekistan; on the basis of education of ideological consciousness, education of hatred against terrorism and religious extremist ideas can be an example of this.
