Article history:	Abstract:
Received: 20 th August 2023 Accepted: 20 th September 2023 Published: 24 th October 2023	Today's in the day initial class to his student's ecological education to give in the process nature save competencies form, to nature reasonable in relation being, nature laws and events about creative thinking development, ecological education based on ecological values absorb through initial class in their students ecological knowledge and skills to develop reach.
Keywords: ecology, nature, ecological education, environment, ecological mind.	

The environment protection to do problems universal importance occupation is enough After all, it 's today in the day science and technology fast in photographs developed, human and nature o' between natural balance that it is being destroyed, to nature relatively society in the organs care slow to the situation come the rest due to to the environment big loss is enough As a result while today's in the day environment pollution, call to prayer layer to decay reason is happening This while of course own in turn of people to health where level his own negative effect showing that it is coming witness we are Such surface coming to the problem the solution we first of all o' sib coming young to generation ecological education to give through we find can[9].

Ecological education - of society ecological of culture important structural part, nature and of society o' zoro relationships in order to bring and to nature cautiously in relation to be forms[8].

O' sib coming age - generation ecological education the most first of all in the family parents and side around people by given will go

Primary class students ecological educate them nature in the bosom different excursions organize and them nature with from introduction begins[11]. Famous from pedagogues one VASukhomlinsky "To children my soul fido" in his work "Men boys " Alifbo". open, first the word squealing to their studies until first the most wonderful in the world book is nature the book reading that they can "I would like to, "he said about all things of the child initial education from the start to teach, educate to the goal is appropriate[7].

As you know, mother nature his own incomparable his generosity with to people service by doing will come Own in turn our people also love nature protect, protect, honor according to to himself special Uzbek values , traditions ceremonies and to himself special education method through one how many centuries during to younger generations education giving came[16].

Uzbek of the people nature and a person relationship, mutual connection, of nature the generosity of a person to nature love about ideas people oral in his work, the people in proverbs and epics reflection delivered[12]. Our people from nature ayro that he cannot grow old, in him each one plants, trees, flowers, insects, birds, birds and animals in nature place good realize enough To nature in relation own faith, knowledge, understanding, outlook come out, prudence, taste, intelligence with the work caught Because centuries experience to nature in relation to the error road put, small one misunderstanding or indifference heavy to tragedies, losses take to come showed[15]. People nature to himself relatively shown each one error for you are not evil revenge to get understood. That's it because of big ages from day one starting from young a baby in the heart to nature love to wake up aspirants[6].

Today's to the day come and above telling science and technology as we passed development at the expense of on our planet ecological problems surface is coming Ecological problems which one one of the state not but whole one the world to the population belongs to is one of the problems[14]. of society economic development level How high if, his to nature effect reach so is the level a lot will be it is Population number fast grow up to go as a result ecological problems have also increased is going Especially land, water, energy, food with provide about problems whole to world (global) problems turning around is going The problem solution to be done all of the nation development present day and to the future depend In this regard initial class to his students ecological education to give through ecological understanding, skills in students formation ecological education, manners development take will come and that's it with together such ecological problems where level to our health, to live to our conditions effect to show about education giving to go necessary Ecological education and education in teaching innovative approaches ie developed in the states wide

application current, modern pedagogical to technologies based on education system is being created[10]. Study process quality to increase relatively being placed main from requirements one modern informative to technologies based on pedagogical technologies application to reach improvement is considered[5].

this regard, we are educators lesson our training during different ecological educational important have interactive of the methods use, didactic games through in nature ecological of problems on time solution if not done negative consequences about students to his mind absorb need That's it through them to nature cautiously in relation to be about skills appear be starts[13].

Summary in place that's it we say if possible , nature protection first of all to do growing up young to generation depend That's it because of initial class students in his mind lesson transition in processes ecological education through to nature cautiously in relation to be skill formation in the future happen to be possible has been different problems prevention we get can[17].
