Article history:	Abstract:
Received: 7 th October 2023 Accepted: 6 th November 2023 Published: 8 th December 2023	This article provides information on general concepts of spiritual and moral education, spiritual and moral behavior, methods of spiritual and moral education. The meaning of the concepts of morality and moral consciousness is revealed.
Keywords: Ethics, spirituality, education, spiritual moral education, spiritual moral concepts, spiritual moral behavior, moral moral education methods.	

SIGN IN. Society in development education place incomparable. A person educate him knowledge to get, labor to do encourage and his behavior step by step to qualification rotate necessary. Today's in the day of education modern model in society free the thinker person to form take is coming It is a realistic goal and to the will have people bring up opportunity gives. Education and personnel preparation time requirements based on continuous developed and updated is going Continuously education conditions social of life all on the fronts himself manifestation do it will receive qualified experts preparation priority task is. State education standards modern education model based on again seeing released Improved state education standards students support and science majors according to to form mean holds[7].

Spirituality person, nation, state and of society strength, development, opportunities and prospects set giver internal positive, spiritual is a factor.

Ethics (Arabic behavior the meaning means) social mind from the forms one being social relationships and person behavior in order that puts laws and regulations is a set. Morality-personality or group activities evaluation through in society relationships manage is a mechanism. Ethics just relationships in order to bring just for not but them harmonization is also necessary for Relationships manage two different method with done is increased: behavior encourage and to punish[20].

Goodness, orderliness, truthfulness, honesty, justice, hard work, teamwork such as quality and features in itself combined person description moral are called principles. In life the rule as acceptance done from requirements people to themselves people from among example chooses. This it is also called moral

ideal . Morality main edges (principles) - solidarity (personal of interests of generality high appearance as to social subjugation) and humanitarianism (to a person to himself value and final the goal as in relation to be[8].

Education and education each other with organic depends. Man learned to be if he wants the most first of all education necessary, educational a person perfect science the owner be takes Har one of the country today's and tomorrow day that's it in the country of schools to the situation, education to quality depends[15].

Grow up coming young generation knowledge and their in the future how a person to be depending on our country the future imagination what we do can That's why for: "The future belongs to the youth in his hand" - they say. To the child education to give first of all from the family starts. We call the family small[19]. "Motherland". we call Exactly that's it The country is for the child initial education school will be Which one in a sense parents of his child the first teacher is considered That's why for parents too is also high moral to adjectives have to be necessary To the child himself good qualities with example be will receive of parents child in the future beautiful good-natured, high scholarly, to the people benefit touching perfect person will be[9].

Famous pedagogue A.S.Makarenko up to 5 years has been education of the child personality in formation very important important have that note reached past He wrote about it like this; "... the main basis of education five year old finally enough, so you five under the age of what did if you are educational 90 percent of the process organize is enough, next bring up again bring up basically continue is enough Exactly

that's it time range from parents big responsibility Demand is enough Here it is that's it at the time parents to his child more attention to give, his upbringing with serious engage in need That's it period to the child right education give get very important If the school at the age of if so, parents, school even the neighborhood is always there good to the road sheep that 's it family, that neighborhood will flourish. But now in the day children education attention not giving there are many people occurs[18].

Uzbekistan Republic President love Mirziyoyev own in his speeches children in education of the neighborhood place decreased is going our spirituality for the most big risk - most in our people indifference and carelessness getting stronger that it is going note they did. "Indeed from the day to the day such people the number increased is going And that's it separately to emphasize should be present young people are also adults rebuke when giving "to you what", "this my my work, to my work don't interfere", "who are you himself to me mind "to teach" etc sentences they are saying. This is also lack of education one is an example[17]. Exactly that's it a person in the family wrong education found or education which one in place error gone Teachers the rain a drop with is compared. It's raining each the viability of a grain wake up it's the teacher's main purpose each one of the student creative opportunities open is to give Drop waters through to water thirsty to the ground falls and from there navqiran young sprouts unb comes out That is to science thirsty students the future there is a person as forms. Teacher to the children education with together in life to live teaches. of life read the black one teacher introduces it is an exaggeration will not be[10].

To school the first came the child if we say an unpolished stone, the teacher while singer we say Teacher ie singer unpolished of stone beautiful one kohnur creates This is the process easy it won't happen, of course. This is the process easy it won't happen, of course. In this parents are also teachers with in cooperation performance need Both towards it much work spends[16]. So much of labor result of course beautiful will be Only teacher movement and parents or student movement if he doesn't, this is the result will not. Parents teachers with meeting standing need. Because they are their children about a lot things knowing they get That's why for the essence of child education understood and of the child education indifferent didn't happen each one parents family with school between cooperation to strengthen strives[11]. "The child goes to school until completion until parents school with near contact installation, of your child lessons mastery, behavior informed being standing, upbringing issues teacher with in consultation child 's

standing from dasr after what with occupation about informed by doing standing need. Therefore for everyone the same movement to do need. " Science a lot it rained to the rain looks like ."That 's it the rain through teacher students watered. It's rain from the waters happily to drink of the student to himself depends on his parents. Parents this from the waters to drink for to his child help leave needed[12].

So so, the child perfect a person to be for teacher, parents and of the child action itself deed necessary In partnership the work if done, the child to maturity deliver on the way growth will be That's it because of his child maturity wanted parents teacher with constant in cooperation the work take goes and his child his studies, his behavior control does His education, science to get attention gives[13].

CONCLUSION. of the child maturity to find for teacher, parent, even that's it of the child action itself to do need Only then the result will be. The child in education of parents place incomparable. Parent own of his child perfection for, his education, science to get considerate to be need Society progressive to do for education efficient to be need Efficient education for parents knowledgeable, educated to be needed[14].
