Development is an ongoing process with a specific goal in mind. There are certain rules for this process: the goal-orientedness of education, the humanitarian and democratic rule of education, the rule of priority of national and universal values in education, the rule of consistency, systematicity, unity and continuity of educational effects, and others.

**Keywords:** Education, creativity, talent, consistency, systematic, educational, faith, trust, social and national culture, appreciation of values, patriotism

**ENTER.** The theory of education is a part of the science of pedagogy and studies the content, method and organization of the educational process[12]. The essence of the educational process reflects the internal communication and communication skills that are characteristic of this process and appear in certain situations. In the modern pedagogy, it is emphasized that education is not a simple influence of the teacher on the person being educated, but a relationship and interaction between teachers and students in cooperation with each other aimed at a specific goal. Today, it is time to educate not only a person who has knowledge, but a creative person, a business person who is distinguished by his talent. In the process of education, various abilities of a person develop, ideological, moral, volitional, aesthetic qualities are formed, a system of scientific views on nature and society is formed, and physical strength is strengthened. Everyone of periods advance people to education up price those who gave a person maturity science science and in education that those who know From education intended goal, every bilaterally spiritual develop, mentally and moral perfect person from forming consists of[17].

**THE CONTENT OF MODERN EDUCATION.** In order to improve the educational process, all the rules, methods and ideas need to be revised in accordance with the current requirements. Development is an ongoing process with a specific goal in mind[13]. There are certain rules for this process: the goal-orientedness of education, the humanitarian and democratic rule of education, the rule of priority of national and universal values in education, the rule of consistency, systematicity, unity and continuity of educational effects, and others[11].

Education method that of the educator to the children high trust and shar kona qualities content find purpose their consciousness and to iro dasi effect reach to their

shoulders it is said. Education is very difficult league - for methods too different, mayan in the circumstances of them which one one choose to the body came to the situation it depends. Education methods in the field style and tool concept there is also

Education methods in tune main to groups is separated:

1. Social behavior formation

2. Sleepers to his mind effect to do service who does methods

3. Education approval and to punish method.

1. Social behavior of formation u s uli main task - in children moral characteristics content from finding consists of This method leader process is an active activity of young people. This activity to the process home, socially useful work, various assignments and social affairs enters This activity orca responsibility, responsibility, adjectives with thinking, quality work to perform learns School mode too this in the field big important have[10].

2. Social the mind fruit to do in methods national to values faith, trust, social- national culture, values patriotism, patriotism feelings from upbringing consists of

In this:

a ) explanation and to send

b ) sample

c ) discussions

3. Education encourage and punish:

a ) approval

b ) encouragement to give

c ) confidence notice

g ) record to do

d ) thanks notice

e ) reward like there are ways.

Punishment:

a ) rebuke to give, to put

b ) to embarrass - blush

c ) sorry to give

In general education methods perfect a person to educate focus need Independent in Uzbekistan education content purpose national of values preservation of our culture and country independent - gini to the fortification focus need

" Historical experience of tradition heritage being pass of these all of them again new generations that educates to values by the moon colmogi should be " writes first our pr i zid e nt I.A. Karimov " Uzbekistan - XXI in the work " asr bo' sagada "[9].

3. Education main principles .

- a ) Education national idealism and to the goal focus
- b ) Education marriage with tied up take to go
- c ) Labor and socially useful activity in the process bring up
- g ) Person in the team , the team using bring up
- d ) Person respect to do and demand
- e ) Person positive qualities relying on negative sides sleeping
- j ) Age and individual features to account get
- z ) Educational things regularly take to go and systematicity .

Education principles in the matter of great Allama Abu Nasr Pharoah so in mind:

" High moral virtue is in behavior manifestation divisor knowledge, wisdom and thoughtful, conscientious, humble to be the majority goals own personal from the purpose up burn, to the truth love, spiritual to the height aspiration, justice to love such as understands, negative moral traits - ignorance - arrogance, cruelty "[8].

Abdulla Awlani's "Tarbiya". we for either h aet, yo death, yes na jot, yo h destruction, yo happiness, yes disaster is an issue" he said the idea one in observation please Great of enlightenment these s' themselves our century at the beginning our nation for how much mu h im and If it is relevant, it is now in the day we for h am so much more than that h am k o' ra mu h im and do is a tattoo[14].

"Education-education-consciousness max oats, but the same and in q t mind level and his development h am determine is a factor. Therefore, education system from not changing standing up the mind it cannot be changed. Mind, thinking don't change it standing up while we have changed higher the goal is freedom and prosperous society set up will not die"[7].

**SUMMARY:** The educational process is considered the most complex process in the pedagogical system . At the same time, it is very busy and hard work. Touching on the education and spirituality of the young generation, he repeats the following thoughts of the great enlightened pedagogue A. Avloni: "Education

is a matter of life, death, salvation, destruction, - happiness, or disaster for us"[16].

In the work "Toward a just society" "...because education is a product of consciousness, but at the same time it is a factor that determines the state of consciousness and its development. Therefore, consciousness cannot be changed without changing the system of education and training. Without changing consciousness, we cannot achieve our desired goal"- he writes[15].

Education different directions available:

- 1. Mental education
- 2. Physical education
- 3. Labor upbringing
- 4. Sophistication upbringing
- 5. Ethics upbringing
- 6. International education
- 7. Ecological education
- 8. To the profession orientation education.

Of these directions goal from the task come what 's up education methods and forms is determined. Education is at home road and forms orca done is increase:

- 1. Lesson in the process each bilaterally bring up
- 2. Educational su h bats on topics
- 3. Exemplary to behavior have has been famous people with.
- 4. Public educational events (holidays celebration on Saturdays participation reach ).
- 5. Discuss horse lessons Muntazzam transfer
- 6. Own ability, work mahoat demonstration doer contests, exhibitions demonstrations transfer
- 7. Reading conventions organize to achieve
- 8. Team orca effect show
- 9. Various circles organize to achieve
