Article history:	Abstract:
Received: 11 th January 2022 Accepted: 11 th February 2022 Published: 23 rd March 2022	The motherland is the sacred land where a person is born. By the motherland we mean the motherland where our parents and descendants shed their umbilical cord blood. In order to feel the homeland deeply in the heart, it is necessary to know, respect, appreciate and strengthen the examples of patriotism of the people. These feelings, these beautiful high human qualities are a true example of patriotism for our free day. That is, the nation is the pillar of the Motherland.
Keywords: Loyalty, love for the motherland, universal feeling, spiritual values, inviolability of the territory, love of country, homeland defense, patriot.	

It is very difficult to write about the homeland. It is impossible to feel the Homeland without feeling the Homeland in the heart. It is sometimes said that a person who works in another country knows the value of the homeland. In fact, even a person who truly loves his homeland while living in it can fully understand the dignity of the country. In order to feel the homeland deeply in the heart, it is necessary to know, respect, appreciate and strengthen the examples of patriotism of the people. These feelings, these beautiful high human qualities are a true example of patriotism for our free day. That is, the nation is the pillar of the Motherland. A sense of homeland means to love, be proud of, respect and appreciate one's people. It means not to forget our great compatriot scholars, thinkers, sultans of hadith and mysticism, who made a great contribution to the development of the world with their minds and intellects. The feeling of homeland means to live with high faith in our dear and beautiful country and to always be a true child to it. It is impossible not to miss it when it is far away. Only... Another difficulty in writing about the homeland is that often one cannot find a word to applaud or describe what one loves from the heart. Therefore, I would like to see love and respect for the Motherland silently, first of all, in practice, in the good deeds done. I thought that the homeland is a handful of soil. Later I realized that there is a lot of wisdom in this handful of soil and that nothing can be exchanged for my grandmother's yard... Today, as I write about my homeland, I remember those moments. I can't help but think that Uzbekistan is my homeland - my homeland! We have no right to betray the country where we were born

and raised! I discovered that the homeland begins on the threshold of the wonderful days of my childhood. And again, these are kind people around us who teach us to love and respect our country! The human child is thirsty for love for a lifetime. An invisible bond encourages us to live side by side with good people, to work hard, and to strive for a hot and exciting life... The homeland is a sacred place where human blood is shed. Independence is the return of your place, your glory, your freedom, your mother tongue, your national history, your religion, your identity! It's not just high-sounding words. It is a call to the mind and heart of every person who was born and raised in this country, who ate and drank the water of this country! Homeland begins at the threshold. When a person is born, his duty and duty to his homeland will be with him. Everyone should live their life not as "what the homeland gave me" but as "what I gave to my homeland". The child senses the external environment from the mother's womb. According to experts, it is useful for a pregnant woman to read more about different countries. It is also expedient for us to instill in the unborn child the love for the motherland before it is actually born. They compare the homeland to the mother. We have come across the phrase "motherland" very often in many literatures. How holy our mother is to us. "Paradise under the feet of mothers," they say. Our lives are short enough to pay off the debt that our mothers have given us. Motherland is a priceless treasure for a person. The existence of the homeland gives a person unparalleled strength and power. This feeling is deeply ingrained in people's hearts. That is why there is a man who loves and respects his Homeland and does not exchange it

for any wealth. To know the homeland is to know oneself, to understand how each person is connected to the whole of humanity. The homeland is one, so it is sacred. The only thing is to respect the homeland, the mother, the sky, the sun ... In many ways, we compare the homeland with the mother. Because in this world, we cannot find anyone greater than our respected mother. This is our second home, our place of worship. The word homeland always goes hand in hand with the word mother. It's just quality, not the usual metaphor. The homeland is in harmony with the mother who created such a miracle as human birth. The homeland is a place of miracles in the destiny of a human being like a mother. That is why the two miracles are called side by side. The more a person sacrifices for his mother, the more he cares for her, respects her, loves her, cares for her, protects her from various disasters and enemies. If necessary, he will sacrifice his life for the Motherland. If Munis and the venerable Mother bring a person into this bright world, the Motherland will bring him up in the sphere of life, raise him, show him as a person. Therefore, there is no place for a person greater, more honorable and more valuable than the Motherland. Moreover, the feeling of love for the motherland enters the bloodstream through breast milk. This sacred feeling is brought up by the mother goddess. The feeling of homeland enters everyone's blood with the mother goddess, poems and songs that she heard as a child. When a sense of patriotism is formed from infancy, it lasts forever. Patriotism is the most important component of the moral formation of an individual. That is why when a child's sense of patriotism is formed from infancy, it lasts forever. Therefore, it is advisable to combine the following in each person from an early age. Loyalty is the devotion and courage that comes from understanding a person homeland, his duty to those who believe in him and those who love him. There is no one in this world who does not love and dream of his homeland, his homeland. he leaves his homeland. Loyalty and devotion in the human heart come from love for ones homeland.

After all, independence has opened a wide way for us to determine our own destiny, to do great things today and tomorrow. It gave back our will, our religion, our history. We have become free to express ourselves. Thankfully, the great creative and renewal changes that have taken place in our country over the past three years have changed the lives and thoughts of each of us. We have learned to work for a truly bright country with a bright future. Change is everywhere. Every province, city, district and mahalla is fighting for

prosperity. Great achievements are being made in our country. This does not happen by itself. Nothing happens by itself. No one will come and create good conditions for us. Therefore, every citizen of our country should contribute to the great and noble deeds carried out by the President of our country. The homeland is the land where the ancestors lived, where the people grew up, where its language, history, culture, customs and values are formed, grow and develop. It is the childhood duty of each of us to cherish it. At a time when globalization is taking place in the world today, there are also some worrying processes, such as the spread of ideas that promote statelessness and bigotry. At the same time, one of the most important tasks before us is to educate the younger generation in the spirit of devotion to the motherland. it is necessary to awaken and form in them the ideas of acquaintance, understanding of the homeland, national pride, knowledge of the history of the homeland. It is difficult to imagine the homeland without the people. The most important thing in achieving independence is the ability of our people to persevere in the pursuit of their goals based on their patience, wisdom, tolerance, diligence and creativity. It is necessary to rely on such immortal values as spirituality, morality, enlightenment in inculcating patriotism in the youth. These three great values have always been respected by our people for centuries. Both our sacred religion and the philosophy of the whole East glorified these values, considering them the most important conditions for social development.

The motherland is compared to the mother In many literatures, the phrase "motherland" is often used. How holy our mother is to us. The hadith also says, "Paradise is under the feet of mothers." Our lives are not enough to pay off the debt that our mothers have given us for so long. A mother is not only physically but also mentally exhausted to give birth to her child. Our holy religion, Islam, also emphasizes our duty to mothers. Our duty and duty to our mother must be in harmony with our love for the Motherland. We were born and raised in this dear Motherland, let's do our best for the development of our Motherland. We feel it is our duty to love him and cherish him like the apple of our eye. In some lands, marital discord is the order of the day. This evil has not bypassed our country. As a result, babies are becoming orphans. This has a serious impact on the future of children. It is obvious that an orphaned child is mentally retarded and people of different purposes try to fill the gap. Let's fill this gap in the spirit of patriotism. Let's be kind to each other. Let the children see the love in the family and

give their love to their homeland. In conclusion, we would like to emphasize that this dear and sacred Motherland is inherited from you and our ancestors. Therefore, it is the sacred duty of all of us to do our best for the development of the Motherland, to sacrifice our lives for the protection of the Motherland. In conclusion, I would like to emphasize that this dear and holy homeland was not built for us yesterday or today. This sacred homeland is inherited from great ancestors. Therefore, it is the duty of all of us to make our contribution to the development of the country as much as possible. It was when I was able to make a small change in the life of my country through this checkpoint. For me, this would be the region of greatest happiness.
